Centrepitch: Unleashing Athletic Potential Through Data

Revolutionizing sportsanalytics for grassroots and studentathletes. Democratizing performanceintelligenceforthenextgenerationof champions.

THE CHALLENGE

The Undeniable Gap in Grassroots Sports

If It's Not Digital, It Never Happened

99% of local tournaments rely on paper scoring, erasing match data once games end. Without digital records, talented players lose visibility and growth tracking.

The Monetization Gap: Organizers Struggle

Without digital tools, local organizers depend on self-funding and entry fees, leaving sponsor value—and a multi-crore hyperlocal ad market—untapped.

Coaches Need Data

Coaches and institutions currently make critical decisions based on gut feelings, lacking the data-driven insights essential for optimal development.

Inaccessible High-End Analytics

Affordable, scalable analytics platforms are virtually non-existent for early-stage athletes, creating a significant barrier to entry.

OUR SOLUTION

Centrepitch: Data-Driven Performance Intelligence

- Centrepitch is a sports analytics and performance intelligence platform bridging the critical gap in grassroots sports by turning raw data into actionable insights for fair talent identification.
- We replace paper scoresheets with a cloud-based scoring engine, giving local tournaments a broadcast-quality digital presence with real-time match data for fans, families,andscouts.
- We turn cost centers into profit centers by aggregating local sports inventory into a hyperlocal ad network, enabling SMEs to run targeted ads and organizers to earn beyond entry fees.
- Our proprietary “True Rank” algorithm analyzes player history to generate a unified Sports Credit Score, eliminating mismatches and enabling data-backed, merit-based rankings.

PRODUCT & FEATURES

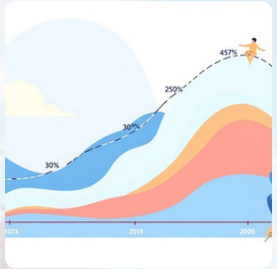
Empowering Athletes and Coaches with Precision

Athlete Performance Dashboards

Personalized, intuitive dashboards for athletes to visualize their progress and strengths.

Match & Training Analytics

Detailed breakdownsof game-day performance and training session effectiveness.



Skill Benchmarking & Tracking

Compare skills against peers and track measurable improvements over time.

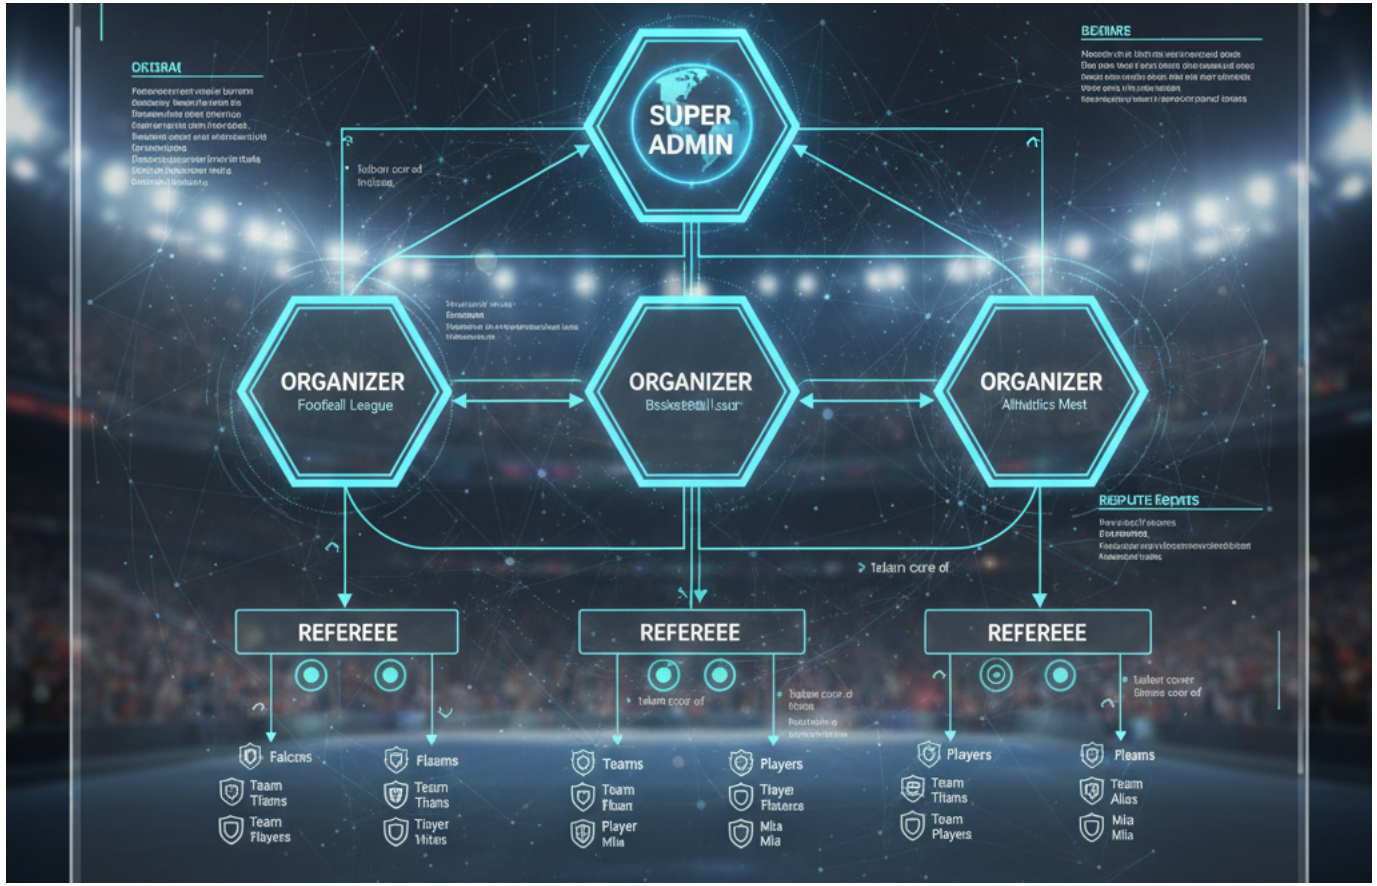
Data-Backed Feedback

Actionableinsights for athletes and coaches, moving beyond subjective obser vations.

AI-Driven Insights (Future)

Leveraging artificial intelligence for predictive analysis and personalized recommendations.

CENTREPITCH SPORTS MANAGEMENT SYSTEM



Super Admin: Provides top-down oversight and global system control.
Organizers: Manage league-specific logistics, scheduling, and coordination.
Referees & Teams: Execute match-day operations and generate real-time data
